

### DESCRIPTION

The ADAX Drying Rack enables quick and efficient drying of footwear and clothes by direct low temperature heat. The Drying Rack quickly dries wet footwear with the added benefit of making them warm and comfortable. No more soggy cold shoes and boots with the potential for bad smells and bacteria. The Drying Rack also won't shrink footwear as it operates at low temperature. It can be swung up against the wall out of the way when not in use. The Drying Rack can be completely covered and can accommodate a number of items at a time. The Drying rack is 87cm in length and has a heat output of 80W. 2 year manufacturers warranty.

### APPLICATION

The Drying Rack is ideal for busy homes, guest houses, hotels, outdoor pursuit providers, ski lodges and sports enthusiasts. The Drying Rack can also be used to dry gloves and other small items of clothing and is a useful and essential device for those who work outside or for those whose boots get damp from moisture build-up.

### COMPLIANCES

- IEC 60335-2.43:2003
- IEC 60335-1:2002
- IP 24C splash proof

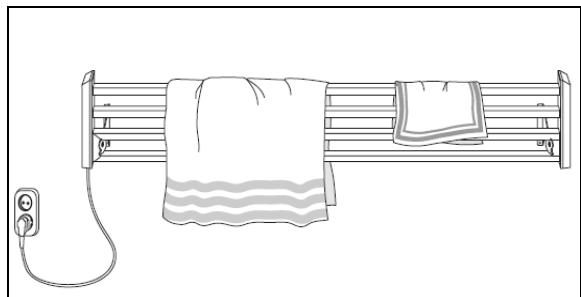

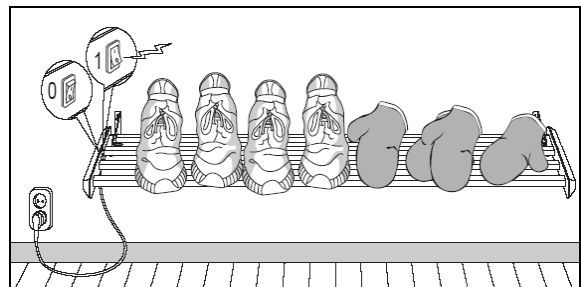

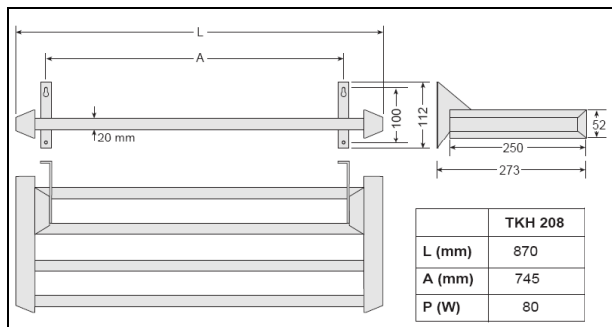

### CONSTRUCTION

- Epoxy coated steel frame
- Integrated power switch
- Complete 1.3m flex and plug.

Fig 1

### INSTALLATION
